EDUCATION

B.Tech, Computer Science & Engineering
Gautam Buddha University, Greater Noida
2021 - 2025
CGPA: 8.04/10

Senior Secondary (XII), Science
S D Public School
(CBSE board)
Year of completion: 2021
Percentage: 78.00%

Secondary (X)
S D Public School
(CBSE board)
Year of completion: 2019
Percentage: 77.00%

TRAININGS

Blockchain And Its Applications
NPTEL, Online
Jan 2024 - Apr 2024

PROJECTS

E-commerce website

Sep 2023 - Oct 2023

As a web developer, an e-commerce website is a platform designed to facilitate online buying and selling. It typically includes features like product listings, shopping cart functionality, secure payment gateways, user accounts, and order management systems. The design should be user-friendly, visually appealing, and responsive across different devices. Backend functionality is crucial for inventory management, order processing, and database management. Security measures, like SSL encryption, are essential to protect sensitive customer information. SEO optimization ensures visibility on search engines, while analytics tools track user behavior for optimization. Ongoing maintenance and updates are necessary to ensure smooth operation and security.

Portfolio

Aug 2023 - Sep 2023

As a Python developer, I specialize in crafting robust web applications with seamless integration of frontend and backend

technologies. Leveraging my expertise in Django for backend development and proficiency in HTML, CSS, Tailwind CSS, and
JavaScript for frontend design and backend design, I have built dynamic and responsive web solutions that prioritize user experience and functionality.
